Training attributes	Training Field: GX, DX Course Type: Lecture Basic Knowledge: Required Applicable Industry: Manufacturing and Service Industries Highlight of Training Benefit: **GX**: 30-50 % CO_2 reduction; **DX: 30-50** % productivity improvement

Contents of Training

An intensive 2-day program designed to "Redesign" business processes through a combination of lectures and hands-on exercises using Generative AI and No-code tools.

- Day 1: AI-Driven Document Automation Mastering structured Prompt Engineering and RAG to automate workflows like emails, reports, and meeting minutes. We target a 30-50% reduction in processing time and promote paperless GX operations.
- Day 2: No-code App Development Empowering non-engineers to build functional business applications via natural language AI instructions. Participants learn to replace manual Excel-based management with custom digital tools, establishing a sustainable "Kaizen" implementation loop.
- Strategic Roadmap & Governance Developing concrete 30/90-day roadmaps with quantitative ROI calculations.

Expected Training Benefits

- Gain practical skills in prompt engineering and RAG to automate document creation (emails, reports, meeting minutes).
- Acquire the ability to build functional business applications using natural language instructions without coding.
- Design a data-driven 30/90-day AI implementation roadmap including quantitative ROI calculations.
- Achieve a 30-50% reduction in document processing time for targeted workflows.
- Eliminate manual, inefficient Excel-based processes by deploying at least one custom business app per participant.
- Realize positive ROI on AI tool investments within 12 months.
- Reduce GHG emissions through 30-50% paperless operations in document-heavy workflows.
